

## One Day Biking – Chiriboga (3,400 mts.)

We will depart from Quito at 7:00 a.m. on a 4 X 4 jeep heading south. Actual ride will start at San Juan de Chillo Gallo (about 35-40 min drive). Cycling starts at 3.100 mts. The ritual of getting ready (safety briefing, bikes and safety protection) is witnessed only by the weather and the terrific view of the Andean Range heading to the Pacific Ocean. The 36-Km of downhill will be unique, there will be no traffic at all and trails are great. These trails were abandoned because a new and shorter road to the Coast was built years ago.

While descending, temperature and humidity will increase. Then, in a short time we will be crossing the cloud forest. Every time we will stop to take a break, we will be able to watch a variety of birds and a wonderful scenery. After lunch the guide, a river and the waterfalls will be our only company. We will descend more than 2.000mts on incredible trails and believe it, it will be fantastic!!.

### Characteristics:

Type: Cloud Forest

Distance: 100 km. Downhill: 60% - Cross-country 40%

Maximum altitude: 3.000mts / Minimum altitude: 1.700mts
